

# 搜索图标组件制作

## 编写icon列表模板

```
<style>
  #chooseicon {
    margin:10px;
  }
  #chooseicon ul {
    margin:5px 0 0 0;
  }
  #chooseicon ul li{
    width:41px;height:42px;
    line-height:42px;
    border:1px solid #efefef;
    padding:1px;
    margin:1px;
    text-align: center;
    font-size:18px;
  }
  #chooseicon ul li:hover{
    border:1px solid #2c3e50;
    cursor:pointer;
  }
</style>
<script id="chooseicontpl" type="text/html">
  <div id="chooseicon">
    <div>
      <form onsubmit="return false;">
        <div class="input-group input-group-md">
          <div class="input-group-addon">{:___('Search
icon')}}</div>
          <input class="js-icon-search form-control" type="text"
placeholder="">
        </div>
      </form>
    </div>
    <div>
      <ul class="list-inline">
        <% for(var i=0; i<iconlist.length; i++){ %>
          <li data-font="<%=iconlist[i]%>" data-toggle="tooltip"
title="<%=iconlist[i]%>">
            <i class="fa fa-<%=iconlist[i]%>"></i>
          </li>
        <% } %>
      </ul>
    </div>
  </div>
</script>
```

```
</div>
</script>
```

把模板放到application/admin/view/common/iconTpl.html

## 页面引入icon模板并编写js代码

### 1、视图模板中引入

```
<!-- 引入图标模板 -->
{include file="common/iconTpl" /}
```

### 2、编写组件,注意id等属性,与后面的js代码对应

```
<div class="input-group input-groupp-md">
    <span class="input-group-addon"><i class="fa" id="icon-
style"></i></span>
    <input type="text" class="form-control" id="icon" name="row[icon]" />
    <a href="javascript:;" class="btn-search-icon input-group-addon">搜索
图标</a>
</div>
```

### 3、编写按钮js

```
/**
 * 图标搜索 开始
 */
var iconlist = [];
//打开图标模板页面
var iconfunc = function () {
    Layer.open({
        type: 1,
        area: ['99%', '98%'], //宽高
        content: Template('chooseicontpl', {iconlist:
iconlist}))
    });
};
//icon input 内容变动事件
$(document).on('change keyup', "#icon", function () {
    $(this).prev().find("i").prop("class", $(this).val());
});
//图标搜索按钮点击事件
$(document).on('click', ".btn-search-icon", function () {
    if (iconlist.length == 0) {
        $.get(Config.site.cdnurl + "/assets/libs/font-
awesome/less/variables.less", function (ret) {
            var exp = /fa-var-(.*):/ig;
            var result;
```

```

        while ((result = exp.exec(ret)) != null) {
            iconlist.push(result[1]);
        }
        iconfunc();
    });
} else {
    iconfunc();
}
});
//图标模板中的图标点击事件
$(document).on('click', '#chooseicon ul li', function () {
    $("input[name='row[icon]']").val('fa fa-' +
$(this).data("font")).trigger("change");
    Layer.closeAll();
});
//图标模板中的搜索input 输入事件, 进行图标筛选
$(document).on('keyup', 'input.js-icon-search', function ()
{
    $("#chooseicon ul li").show();
    if ($(this).val() != '') {
        $("#chooseicon ul li:not([data-font*='" +
$(this).val() + "'])").hide();
    }
});
/**
 * 图标搜索 结束
 */

```

图标:

fa fa-align-justify

搜索图标
