2022/04/28 10:32 1/3 附件选择组件

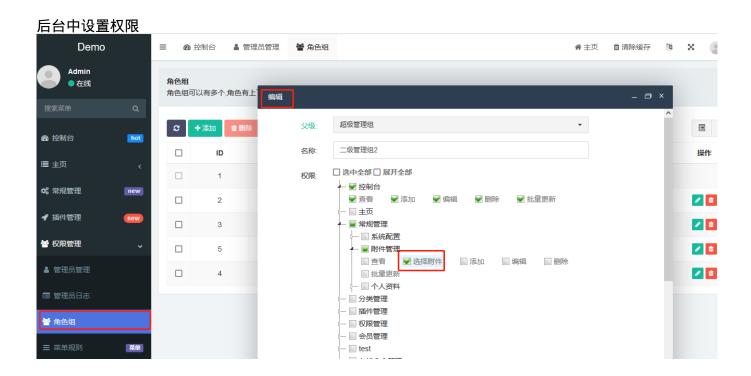

附件选择组件

fastadmin框架的附件选择组件,默认是没有权限限制的,显示的是所有上传过的文件

附件表 ☐ fa_attachment

附件选择增加权限控制

附件选择只显示本人上传的文件

只显示本人上传的附件

在 application\admin\controller\general\Attachment.php 文件修改,大概65行处:

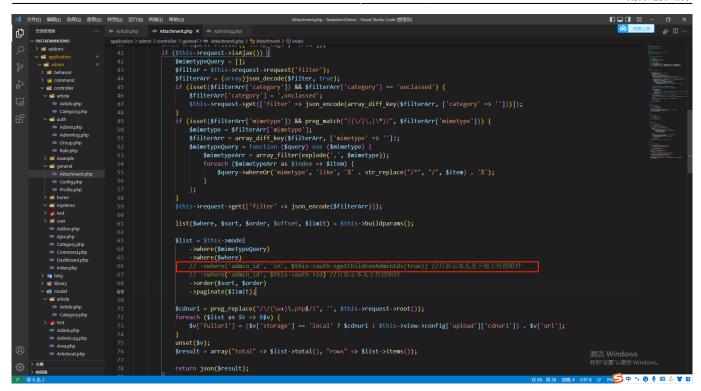

```
if ($this->request->isAjax()) {
      (Stnis->request->tsAjax()] [
$mimetypequery = [];
$filter = $this->request->request('filter');
$filterArr = (array)]son_decode($filter, true);
if (isset($filterArr['category'] = %ak $filterArr['category'] == 'unclassed') {
$filterArr['category'] = ',unclassed';
$this->request->get(['filter' => json_encode(array_diff_key($filterArr, ['category' => '']))]);
      }
if (isset($filterArr['mimetype']) && preg_match("/(\/|\,|\*)/", $filterArr['mimetype'])) {
    $mimetype = $filterArr['mimetype'];
    $filterArr = array_diff_key($filterArr, ['mimetype' => '']);
    $mimetypeQuery = function ($query) use ($mimetype) {
    $mimetypeQuery = array_filter(explode(',', $mimetype));
    foreach ($mimetypeArr as $index => $item) {
        $query->whereOr('mimetype', 'like', '%' . str_replace("/*", "/", $item) . '%');
    }
}
                ->where($mimetypeQuery)
->where($where)
             // ->where('admin_id', $this->auth->id) //只显示本人上传的附件
                ->order($sort, $order)
->paginate($limit);
       pubset($v);
sresult = array("total" => $list->total(), "rows" => $list->items());
```

代码如下

```
->where('admin id', $this->auth->id) //只显示本人上传的附件
```

2、如果只显示本人及下级上传的附件

在 application\admin\controller\general\Attachment.php 文件修改,大概65行处:

代码如下

->where('admin_id', 'in', \$this->auth->getChildrenAdminIds(true)) //只显示本人及下级上传的附件
